

## Capstone Project: Applying UI/UX Design in the Real-World

### Lab: Drafting a Case Study Summary Based on the Capstone Project

Instructions: Fill out each section below based on your research and insights. Replace the guidance in parentheses with your own content.

#### **Step 1: Define your role and core services**

*(In Google Docs write a two-to-three-point summary describing UX research, web app UI design, Mobile app UI design, Figma prototyping, Wireframing and user flows, and information architecture.)*

[Your response]

#### **Step 2: Write your profile introduction**

*(Draft 100-to-150-word summary that you can reuse across different platforms.)*

[Your response]

#### **Step 3: Highlight your capstone project and case study**

*(In the Figma file, add a key visual or generate a Figma preview link.)*

[Your response]

**Step 4: Customize each platform**

*(Add a freelance platform and a job platform to modify your content.)*

[Your response]

**Step 5: Prepare supporting content**

*(Add Figma prototype link and online portfolio or resume link.)*

[Your response]

**Step 6: include featured projects**

*(Describe one or two strong projects with its title, role, tools, and case summary.)*

[Your response]

**Step 7: Add awards or achievements**

*(Include design challenges or competitions, client or stakeholders, and any public mentions in the awards or achievements section.)*

[Your response]

**Step 8: List education and certification**

*(Include relevant degree, school, graduation year, relevant courses, certifications, and its ID.)*

[Your response]

**Step 9: Review and export**

*(Review your resume before sending it to the potential employer.)*

[Your response]
